

OSA 2079-04

5 MAY 1964

MEMORANDUM FOR: Director of Communications

SUBJECT: Requirement for Additional Technical Support on Project [REDACTED]

25X1A

1. Under an existing agreement, the Office of Communications assumes responsibility for wire equipment technical support for Project [REDACTED]. The support rendered has historically been entirely satisfactory. The Chief, [REDACTED] has been most conscientious in assuring that an experienced and capable technician has been available at all times for rendering this support.

25X1A

25X1A

2. During the last two years, however, the wire equipment workload within OSA has increased at an unprecedented rate. During this time, the number of OSA [REDACTED] circuits has doubled, and the total number of OSA stations has increased by over 70 per cent. Although the presently-assigned Wire Equipment Technician (Mr. [REDACTED]) is performing very commendably, the additional workload imposed by the new communications requirements and the Electronic Data Processing program presents a towering task, requiring the services of more than one technician.

25X1A

3. The Communications Division, OSA, feels that the present wire equipment workload within the [REDACTED] Project demands the assignment of at least [REDACTED], and possibly [REDACTED] technicians. We urgently request that you favorably consider assignment of [REDACTED] additional technicians to Project Headquarters at an early date. The Communications Division, OSA, will be most happy to discuss present and anticipated OSA wire responsibilities with your designated representative at any time.
